

Application No. 09/360,440

**Amendments to the Specification:**

Please replace the paragraph on page 10, lines 13-20, with the following amended paragraph:

The data table object 222 populates one or more internal caches with read or write data associated with the datastore 214. Queries to the datastore 214 are serviced by the cache or caches through the data table object's table interface. Using at least one "update" method, data in the reach cache of data table object 222 may be refreshed from the datastore 214 and data in a write cache may be flushed to the datastore 214. Data table objects are described in more detail in U.S. Patent Application No. [[\_\_\_\_\_]] 09/360,442, now U.S. Patent No. 6,598,037, entitled "DATA TABLE OBJECT INTERFACE FOR DATASTORE," assigned to the assignee of the present application, filed concurrently herewith and incorporated herein by reference for all that it discloses and teaches.
